AUTHOR PROFILE

GEORGE ORWELL

Eric Arthur Blair (25 June 1903 – 21 January 1950), better known by his pen name George Orwell, was an English novelist, essayist, journalist, and critic. His work is marked by lucid prose, awareness of social injustice, opposition to totalitarianism, and outspoken support of democratic socialism. Orwell wrote literary criticism, poetry, fiction, and polemical journalism. He is best known for the allegorical novella *Animal Farm* (1945) and the dystopian novel *Nineteen Eighty-Four* (1949). His non-fiction works, including *The Road to Wigan Pier* (1937), documenting his experience of working class life in the north of England, and *Homage to Catalonia* (1938), an account of his experiences in the Spanish Civil War, are widely acclaimed, as are his essays on politics, literature, language, and culture. In 2008, *The Times* ranked him second on a list of "The 50 greatest British writers since 1945". Orwell's work continues to influence popular and political culture, and the term Orwellian – descriptive of totalitarian or authoritarian social practices – has entered the language together with many of his neologisms, including Big Brother, Thought Police, Room 101, memory hole, newspeak, doublethink, proles, unperson, and

Prisoners of Geography: Our World Explained in 12 Simple Maps
- Illustrated Edition: Amazon.co.uk: Tim Marshall:
9781783964130: Books

It is a fantastic book which explains in pictorial forms and maps, the history of the world and how geography has shaped the world we live in today. From this book you will find out how geography is responsible for how countries borders have been defined. How these have changed over time and how they may look in the future. You also can learn about the history of conflicts around the world and again how geography has played a central role in this.

For me, this book was like finding missing pieces of a jigsaw that helped piece together how the world has changed and transitioned throughout time.
