

## *Salford City Academy Development - Dining Room Extension and Irwell Building refurbishment*

Here at Salford City Academy we are embarking upon an exciting development project to improve teaching and learning spaces within the Irwell building and expand the dining room facilities to improve lunchtimes for our students.

This development of specialist learning spaces, creating new performing arts, ICT and music rooms, will allow the school to participate in a wide range of performing arts activities.

As part of this project United Learning have invested in new specialist music, drama and ICT equipment, as well as an additional outdoor teaching and dining area next to the Irwell building which will be covered by a bespoke canopy due for completion in Summer 2022.

The dining expansion facility will see the existing dining space increased in size allowing more indoor seating, and an upgraded kitchen, to ensure the highest quality of food and service for the students. The bright, contemporary dining area will have the feeling of a café environment with full height windows, with a mixture of podium and booth seating, along with traditional table seating.

Vivid graphics on the wall will reflect the school's key values along with highlighting the need to focus on wellbeing, health, and the environment. In addition, this area will also have an option for outdoor dining with another bespoke canopy which links into the dining extension.
