

OVERVIEW

The Geography curriculum at Salford City Academy inspires a fascination in students about our world and its people. Geography provides pupils with a knowledge of diverse places, people, resources, and natural and human environments. It enables students to develop a deep understanding of the Earth's physical and human processes allowing students to celebrate the opportunities and understand the challenges of a range of places. The curriculum ensures students can think like geographers and use their valuable geographic knowledge to make sense of the world around them. This will allow them to take part in the geographical debates of today and tomorrow.

Aut

Life in an emerging country

- Describe the location and characteristics of emerging countries.
- Explain why rural to urban migration is a key feature of emerging countries.
- Assess the opportunities and challenges faced by people living in Rio de Janeiro.
- Evaluate the impacts of Shell (a TNC) locating in Nigeria (an emerging country).

Assessment:

'There are more opportunities than challenges in Rio.'
How far do you agree with this statement?

UL mid year assessment – Life in an emerging country.

Spr

Climate change

- Describe the evidence to suggest that the World's climate is changing.
- Explain the natural and human processes which cause climate change.
- Discuss the impacts that climate change will have globally.
- Evaluate the effectiveness of methods used in response to climate change (mitigation and adaptation).

Assessment:

Evaluate the effectiveness of the response methods to climate change.

Sum

Issues of urbanisation
